Art Unit: 1618

Claims 1, 2 and 5-20 are presented for examination.

The remarks filed on November 14, 2005 have been received and entered.

Claims 1, 2 and 5-20 are rejected under 35 U.S.C. 103 as being unpatentable over the European Patent Application 0224 352 for the reasons set forth on pages 2 and 3 of the office action of May 23, 2005.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant alleges criticality to the advantages of the claimed concentrations and droplet size on pupil diameter over the prior art. Applicant refers to the data in the specification to demonstrate such advantages. The allegation is not well taken. The presented data in the specification compare a dosage form administered by a pipette to the dosage of the claimed invention. There is no evidence of record to compare the dosage form used by the jet stream of the instant application with the jet stream of the prior art. Furthermore, such data are not commensurate with the claimed language. The data is drawn to a couple of ophthalmic active ingredients, however the claims are not so limited.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
